## AMENDMENT

After a lot of research and effort from my classmates and I, we came up with different solutions to amend the second amendment without taking the rights of the US citizens. I am going to be discussing my solution. As stated in the second amendment, I believe that the US citizens have the right to keep and bear arms. However, there should be regulations and procedures that we as US citizens should go through before owning a gun. Some suggestions that I could give are an age requirement (21 or older), mental health screening, criminal record check, and more. I really hope that after reading some suggestions of how to amend the second amendment we citizens see changes that would determine our future.

## STATISTIC

Another senseless death.
